

## **Program Intern**

### **About the Role**

We are currently seeking a data-driven and detail-oriented Program Intern to join us. This role will involve critical thinking, problem-solving, and analytical thinking to drive operational improvements and support strategic initiatives.

### **The charter for this role will include:**

- Work closely with the founder/senior leaders to turn ideas into validated experiments.
- Dive into industry trends, discover competitor insights while also working on user research.
- Build a hypothesis to solve the different problem statements, execute, validate and scale the results
- Align with stakeholders across the org to drive the actionables; be a driving force in cross-functional teams
- Present findings, recommendations, and progress updates to leadership.
- Support key projects and initiatives, ensuring they are on track and aligned with the company's objectives

### **Ideal Persona would:**

- Prior experience in building a start-up or interning at a start-up.
- Good communication and presentation skills, both written and verbal.
- Ability to work collaboratively and effectively with diverse teams and stakeholders.
- High on agency with first principle problem-solving approach
- Familiarity with analytical tools like Excel (advanced), SQL, Python, or other business intelligence software is a plus.
- Strong organizational skills and ability to manage multiple tasks simultaneously.
- A proactive mindset with a strong ability to identify potential problems and come up with creative solutions.
