We are hiring!

Osfin.ai is building cutting-edge solutions to help firms streamline their financial operations. Leading organizations across industries have automated fin-ops processes using Osfin.ai. Our founders are alumni of IIT Kanpur with extensive experience across product development and management consulting.

We are looking for talented folks to join our 10X growth journey, and be part of a rapidly growing global team spread across our offices in India and the US.

Who is an ideal fit for us?

We seek professionals who are analytical, demonstrate self-motivation, exhibit a proactive mindset, and possess a strong sense of responsibility and ownership in their work.

What will you get to work on?

As a member of the Product Implementation team, you will:

- Design, develop, and optimize complex SQL queries to extract, transform, and analyze data from multiple database tables.
- Create advanced reports and dashboards using SQL, stored procedures, and other reporting tools to support business intelligence and decision-making.
- Develop and maintain database structures, stored procedures, functions, and triggers to support analytical and operational needs.
- Collaborate with business stakeholders and analysts to understand reporting and data analysis requirements, translating them into efficient database queries.
- Optimize database performance by tuning SQL queries, and indexing to handle large datasets efficiently.
- Perform deep data analysis to identify trends, anomalies, and actionable insights for business teams.
- Automate data extraction, transformation, and reporting processes to improve efficiency and reduce manual effort.
- Ability to work in a fast-paced environment, managing multiple tasks efficiently.

What do we expect from you?

For the SQL/Oracle Developer role, we are seeking candidates with the following skills and Expertise:

- Proficiency in SQL and MS Excel
- Work experience of more than one year in SQL/Oracle is mandatory
- Java experience is a plus but not mandatory
- Strong communication skills, allowing for seamless interactions with customers to understand their requirements thoroughly
- Capable of working independently with minimal guidance, showcasing self-reliance and Initiative
- Previous experience in working on automation projects, bringing valuable insights and efficiencies to the processes
- Work From Office: Bangalore/Navi Mumbai/Pune/Client locations

Why join us?

Discover unparalleled professional and financial growth by joining our dynamic team, where we offer:

- A remarkable team of industry experts with a proven track record for driving impact
- Competitive compensation packages and a generous Employee Stock Ownership Plan
- Opportunities to work with leading customers across diverse industries
- An engaging and enjoyable work environment that fosters collaboration and innovation
